The Neighbourhood

I want to build a site about The Neighbourhood– my favorite band. I think it will be most intuitive with a navigation bar at the top with the home page introducing the band and an overall synopsis. Below are the navigable tabs I think will be most informative:

- **Page 1:** Home- background info on the band, when did they form, their path to fame
- **Page 2:** The Band
    - **Subpage 2.1:** Jesse Rutherford- lead band member, some info on him as well as his solo work
    - **Subpage 2.2:** Jeremy Freedman, Zach Abels, Mikey Margott, Brandon Fried- profiles on other band members, not too much info on them all so can be brief and grouped together
- **Page 3:** Albums- clickable photos and titles of albums leading to subpages
    - **Subpage 3.1:** I Love You album- list of songs, some info about album
    - **Subpage 3.2:** Wiped Out! album- list of songs, some info about album
    - **Subpage 3.3:** The Neighbourhood album- list of songs, some info about album
    - **Subpage 3.4:** Chip Chrome & the Monotones album- list of songs, some info about album
